

HOW TO ORDER

Belly Tanks

Quality Marine Products

This diagram will assist you in ordering a Belly Tank. When measuring for all dimensions, allow 1/2" of clearance.

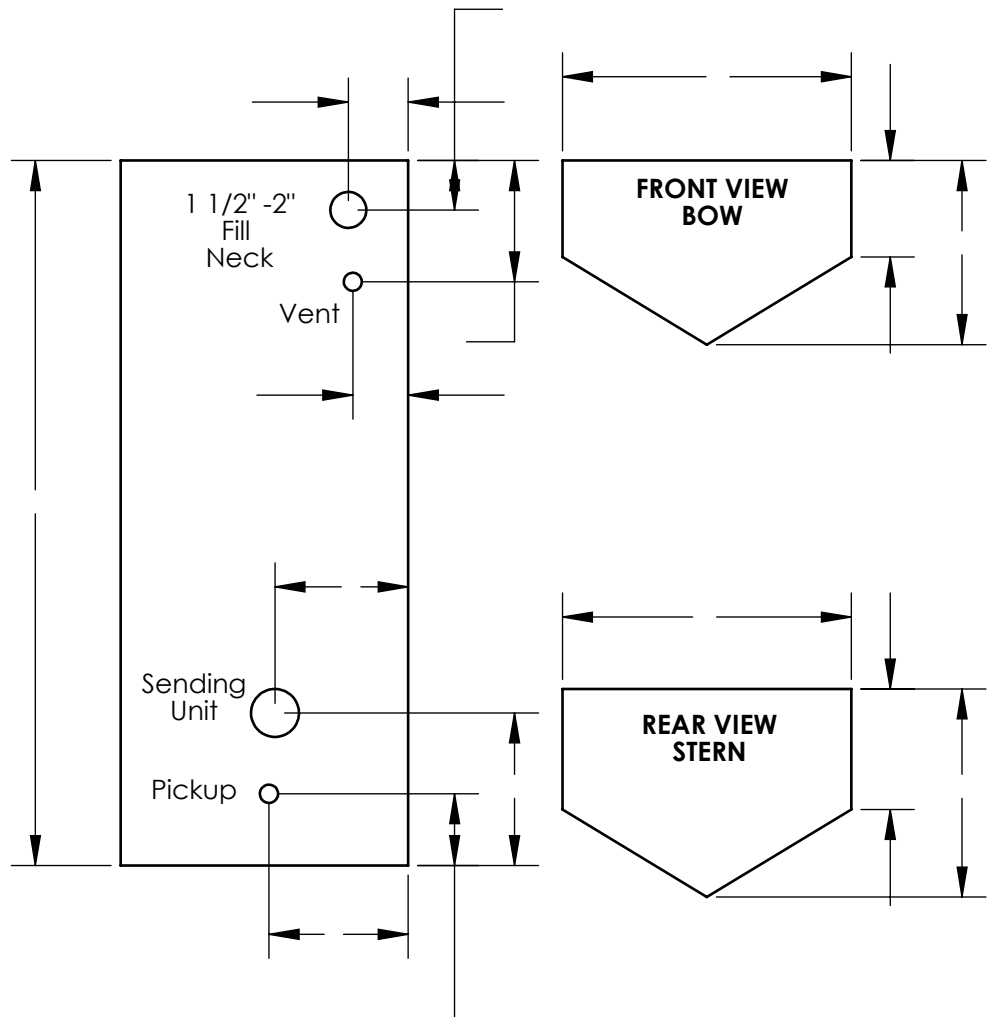

Step 1 (Top View): Measure length and width. Allow 1/2" of clearance for length and width.

Step 2 (Bow View): Measure center-line depth and stringer depth.

Step 3 (Transom View): Measure center-line depth and stringer depth.

Step 4 (Fitting locations): The fill neck diameter is either 1 1/2" or 2". You must indicate exact location. Type and size of vent, either 1/2" or 5/8" NPT.

We suggest pickup to be placed in transom end of tank to allow for rise of bow. You must indicate if you need a fuel sender.

Please print this page and write in your dimensions; then mail or fax to IMCO.
